

## IN2DIGI D-JV-2 DAB/DAB+ PRODUCT – KEY FACTS

- An aftermarket product designed to provide a fully integrated Infotainment DAB Service just as the Jaguar Land Rover (JLR) OEM installed part
- in2digi product supports Service Following on all platforms, exceeding the OEM deliverable
- Fit as a “new install” or “DAB to DAB+” upgrade to Jaguar Land Rover vehicles (typically, 2008 to 2015 timescale)
- *New install* :
  - JLR **do not offer** a vehicle DAB system upgrade kit
  - in2digi product is the only aftermarket part recognised by the official JLR diagnostic tool for the necessary new system configuration update
  - in2digi product interacts seamlessly with the existing user interface
  - supports an on-glass fitted active antenna  
(a recommended product is to be procured separately)

*or*

JLR system antenna amplifier + vehicle on-glass antenna  
(additional system parts to support this option are not available from in2digi and would be at the end user additional cost / discretion)

  - Recommended aftermarket active on-glass antennas
    - Alpine KAE-242DA
    - Funke ADSC710
    - AutoDAB SAD-15
- *DAB to DAB+ Update* :
  - Simply exchange the OEM part for the in2digi module  
(requires basic modifications to power and antenna connections)
  - No new vehicle DAB install configuration required
