

IN2DIGI DAB-USB PRODUCT – KEY FACTS

- An aftermarket product designed to provide a DAB/DAB+ Service in vehicles with a USB data interface – MP3 file structure used
- This product initially launched for Jaguar Land Rover (JLR) vehicles
 - typically, 2009 to 2012; for Gen1 and Gen2 systems as a lower cost option
 - 2015 onward supporting JLR *InControl Touch* and *Touch Pro* systems
- *Simple to install* :
 - Product does not require any vehicle configuration **but equally does not provide a fully integrated solution**
 - Only supports an on-glass fitted active antenna (12V phantom feed)
(a recommended product is to be procured separately)
 - Recommended active on-glass antennas
 - Alpine KAE-242DA
 - Funke ADSC710
 - AutoDAB SAD-15 / SAD-5
- *Comparative products* :
 - Many other low cost products on the market rely on DAB to FM transformation and then interact to the vehicle radio over FM
 - The in2digi product processes and retains all received data in the digital domain resulting in improved reception performance
 - The in2digi product offers iPod / iPhone compatibility connection and charging via the integrated USB-A feature
- Other vehicle platform rollout :
 - in2digi are increasing vehicle coverage utilisation following specific product evaluation and will communicate all via a matrix that will be stored / maintained on the company website
